1966-1967

We take pleasure in dedicating this our 1967 edition of The Eagle to Mr. William Thurlow.

Who has given fifteen years of his teaching career to the students of Midway High School.

Who has been a friend and counselor to many students.

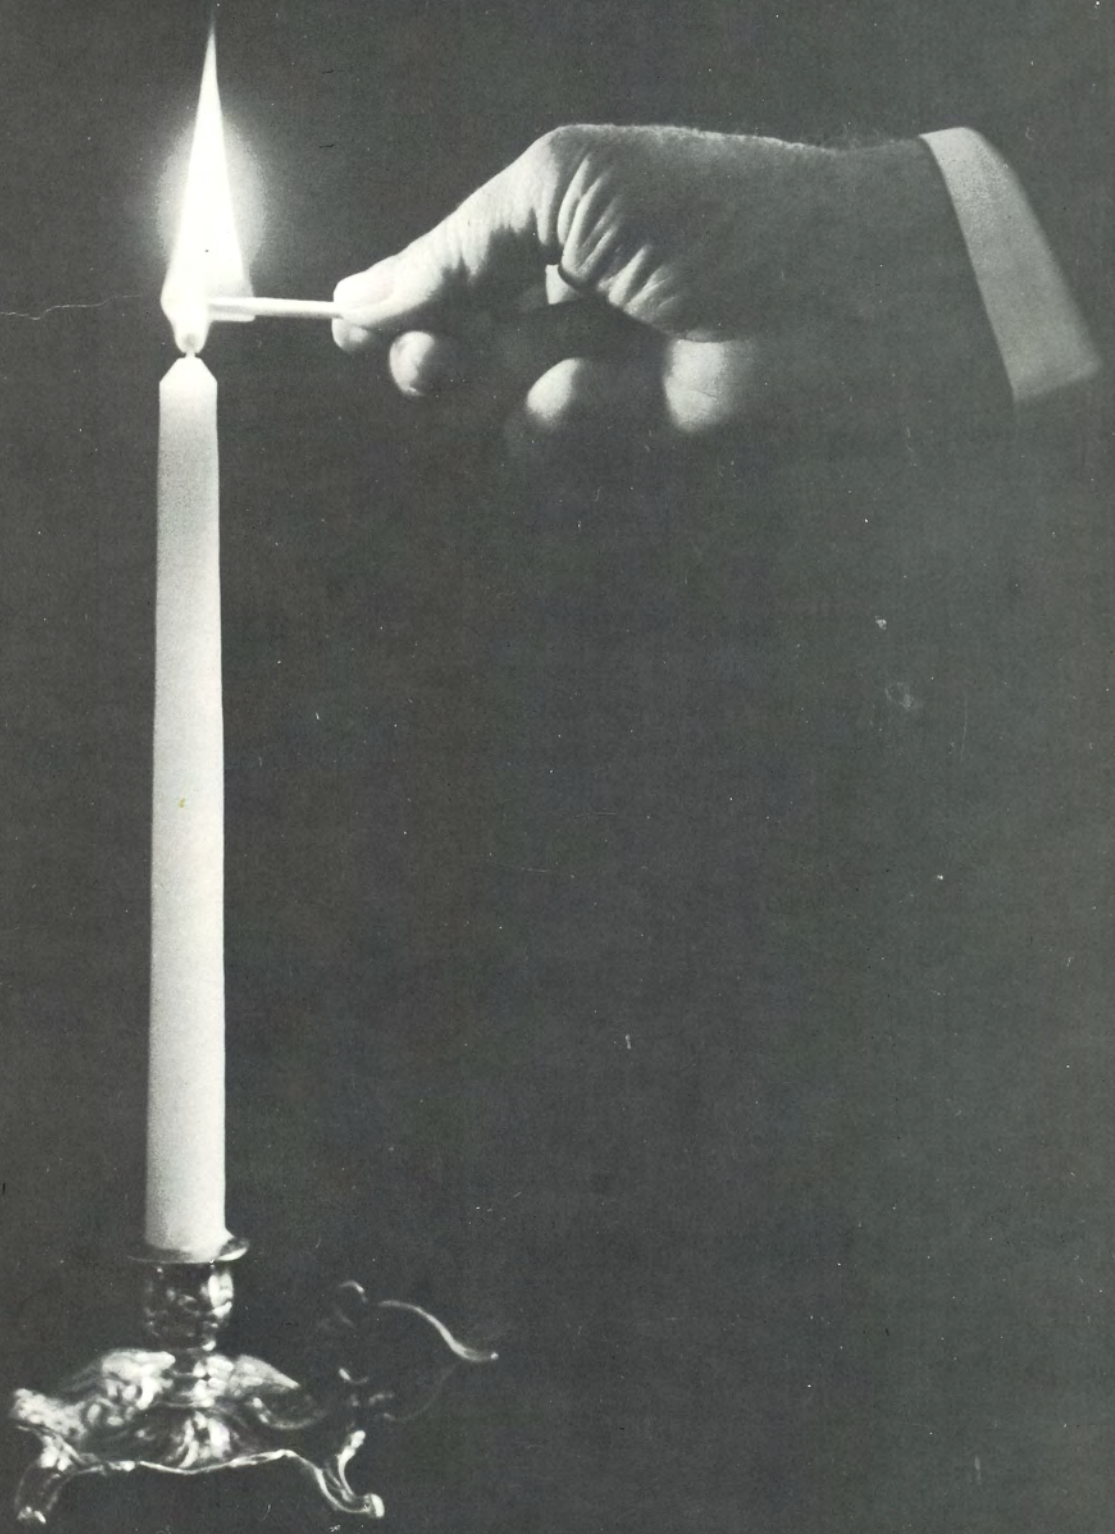

Who has spent many hours as sponsor of the student council and the senior class.

Whose teachings will remain with us for many years.

## *Principal's Message*

CECIL L. GYER  
Principal

It is my hope that the 1967 yearbook will be one that each of you will cherish. You will always be reminded of the happy days you have had at Midway.

This year's senior class has been one of the best classes with which I have been privileged to work. If all classes will try as hard to improve the quality of the school as this senior class has; they, too, will be successful classes.

It is my hope that each of you will be conscious of this sentence, "Life is a picture; let us paint it well."

## Chapter 3 THE BEGINNINGS OF THE GOVERNMENT OF THE UNITED STATES

The roots of American government reach deep into the past. Our system of government did not suddenly spring into being as if the wave of some political magician's wand. Nor was it pulled out of thin air by the

### The Colonial Period

**Our English Heritage.** The French, Spanish, Dutch, Norwegian, and other Europeans settled in parts of what was to become the United States. But it was the English who came in the largest numbers. And it was the English who came to control the thirteen colonies that stretched for 1,500 miles along the Atlantic seaboard.

These early pioneers who cleared the wilderness and fought off the Indians had to look out their own way. Their future lay in the New World. But they came here in search of justice. They

found the Fathers at Philadelphia in the summer of 1787. Rather, it was developed through long centuries of experience. We shall now review the high points of these beginnings.

They brought with them the best political culture which their country had ever known. They brought with them the best ideas of a governmental system that had been working and improving for centuries.

These political ideas were especially important in the thinking of the English. The English were especially interested in the rights of the individual.

SETTLERS AT WORK

Early Americans had to live together in harmony, or they would not survive. This was called "government in order to live," the beginning of our government today.

of which are to be found today in every county, borough, jury, sheriff, coroner, and justice of the peace, for example. And all of these were well known in England long before the first Englishman ever heard of America.

(2) *The First Concept of Limited Government and Civil Liberties.* They brought with them, too, the twin ideas of limited government and civil liberties. That is, that government is limited in what it may do, and especially that it is limited in the sense

that each man has certain rights that government cannot injure or take away. These great principles of freedom were proclaimed in such historic English documents as the Magna Carta in 1215, the Petition of Right in 1628, and the Bill of Rights and the Act of Toleration of 1689.

(3) *The Concept of Representative Government.* A third vitally important concept brought to America in English ships was that of representative government. For centuries there had been developing in England the
